I am proud of my school because we have really nice teachers, subs, secretaries and principals, and when you are walking in the halls the teachers will say “Hi” or want a hug.

I have been here since second grade and I’ve seen this school do some amazing things. For example in 5th grade I used to hate math and in 6th grade my math teacher made it so good. So this school definitely changed my opinion on math for the better. So if any school can change anybody it is this one. That is why I am proud of my school.
